Suinsit provides sample applications adapted to each type of subscription that the user will be able to use and customize on their cloud site at no additional charge.

SUINSIT CLOUD

Cloud Infrastructure

Have your own cloud infrastructure, for applications and projects created with suinsit, using the infrastructure of our partner OVH Cloud

★★★★★

Application Deployment

Publish your applications in our cloud production environments with high availability and tailored to your needs.

★★★★★

Coming Soon

Suinsit Cloud is fully integrated with the infrastructure of our sponsor OVH Cloud with its own data centers on 5 continents.

Applications are deployed on the kubernetes infrastructure integrated with openshift.

But we can also offer dedicated infrastructure, including communications and hybrid cloud solutions.

SUINSIT FOR DEVELOPERS

Source Code Generator

For developers, generate the source code of the application and modify it freely, to expand functionality, customize it or apply more complex behaviors.

★★★★★

Devops

Integrate your applications with our Continuous Integration and Deployment solution for your test and productive environments.

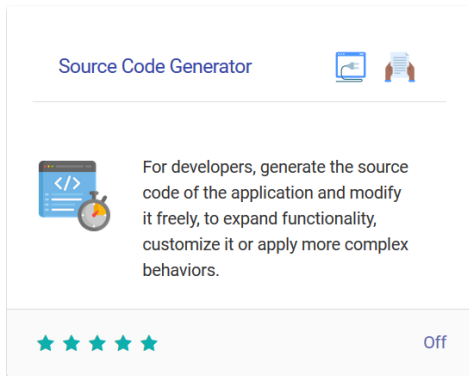

★★★★★ Off

Suinsit is fully integrated with the products of our sponsor zkoss, allowing you to create powerful business applications with more than 200 visual components.

As a developer you can modify and adapt the generated code to deploy it in Suinsit Cloud with our devops infrastructure.

Optionally you can deploy the application created on another platform with the Community version of our sponsor zkoss or the professional version with a development license.

Suinsit has different subscription versions for development teams with full access to the generated code and freedom of deployment in the infrastructure of its clients.

Suinsit will also provide an OEM licensed infrastructure geared towards Tech Startups for vertical product development.

SUNSIT PILOT FREE AND STARTED EDITIONS

At the end of June 2020 we plan to launch a pilot of the free version and started it before our sponsors and its users.

Users who are interested in the started version during the pilot will have a free month in addition to a 35% discount for the first year and subsequent years.
