

SUINSIT

*If your company and services are different from the others,
Why use the same software solutions?
Work the differentiation.*

93% of executives agree that open and custom software, gives them a strategic advantage.

BENEFITS

INCREASES PRODUCTIVITY

Suinsit frees up the time that staff spends on manual and repetitive tasks, will allow them to focus on activities that really add value to their business. Each application built with Suinsit is a personalized product that you can offer to your clients, differentiating itself from its competitors.

Automate processes and enable digital transformation with fewer resources and smaller budgets, which will drive the growth of the company.

SUINSIT OFFICE

WHAT IS SUINSIT OFFICE?

Suinsit Office is a version of our no-code platform, adapted to professional offices.

You can perform from customer onboarding, to the processing of files, document management, integrations with ERP and other third applications.

You will be able to create **self-service applications** that the rest of your organization will be able to access 24/7, providing a better service and decongesting the operation of the company.

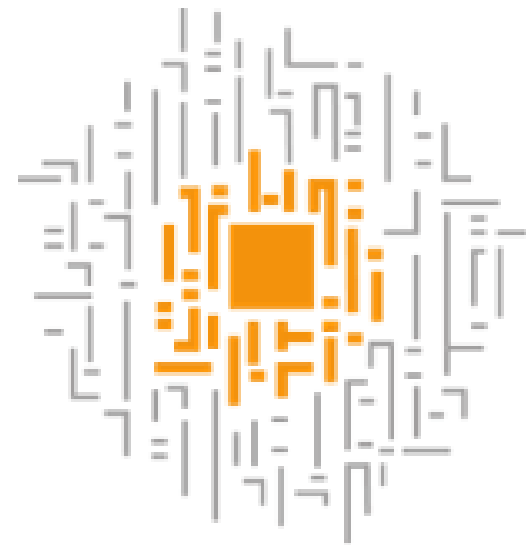

SUINSIT OFFICE

BASIC FUNCTIONALITIES

Suinsit Office provides a series of base modules for adaptation to the needs of your business, even allowing you to provide online services to your customers. From the most basic Suinsit Office option, you will have your own infrastructure **dedicated to your business.**

- Customer Portal
- Suinsit CRM
- File management
- Process engine
- Suinsit Studio
- Document Management

Starting with the base functionalities indicated above, you can **create your own technological solution**, for you and for your clients.
